FQ Fieldquote

Hand test plan

Step-by-step checks for the Fieldquote app, with what you should see at each one. Work through them in order, tick Pass or Fail, and note anything odd.

Checks	Screenshots taken	Tester	Date tested
39 in 13 areas	**22 October 2026**		

Before you start

1. Set the app up and load the demo data by following **docs/SETUP.md**, steps 1 to 7.
2. Add an AI key for Hollis Groundworks in Settings. Section C drafts real quotes, which uses a little AI credit.
3. Connect a mailbox, or the local test mailbox, for sections C1 and J. These checks can be skipped otherwise.
4. Have the three logins to hand: **Dave** (Hollis owner), **Shaz** (Hollis approver) and **Gaz** (Greenfield owner).
5. Use a private window for each new login, or sign out in between.

Areas

A	Signing in and out	4 checks	**H**	Rates and customers	3 checks
B	Today page	2 checks	**I**	Settings	6 checks
C	Drafting a quote	5 checks	**J**	Sending a quote	2 checks
D	Reviewing and approving	7 checks	**K**	Deleting a quote	1 checks
E	Approver limits	2 checks	**L**	Phone-sized screens	2 checks
F	Company separation	2 checks	**M**	Security spot checks	2 checks
G	Site visits	1 checks			

Screenshots come from the demo data. Emails and addresses in them are demo text.

A Signing in and out

A1 Signed-out visitors go to sign in

Signed out

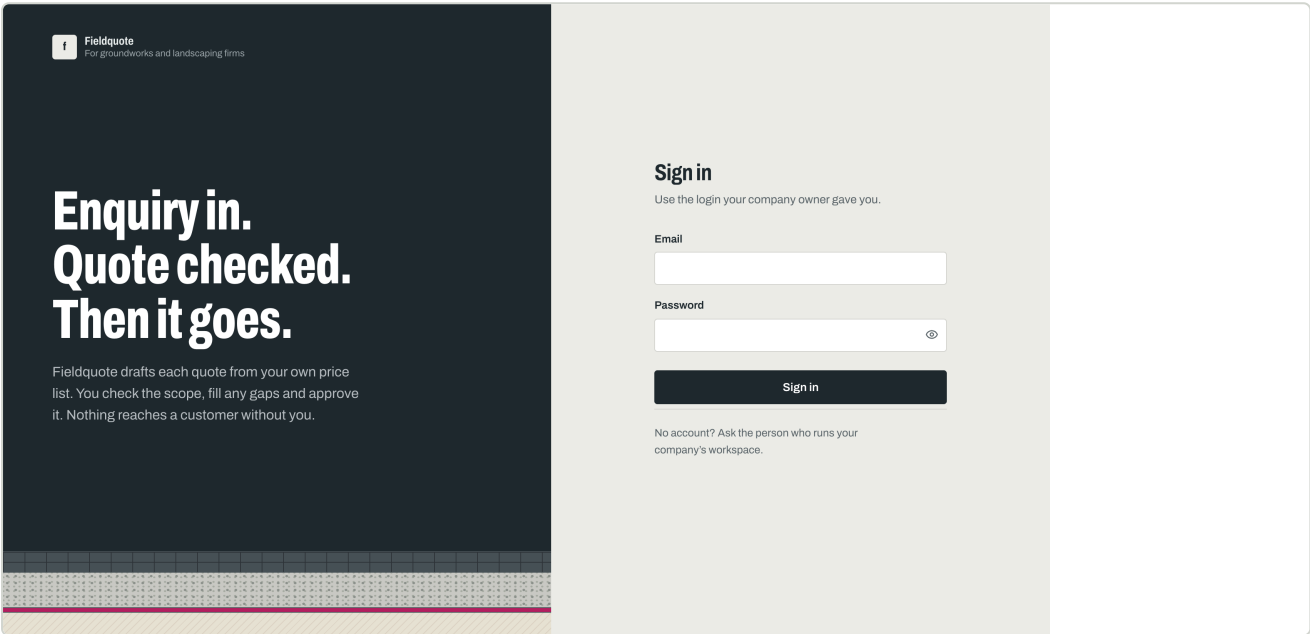

Steps

1. Open the app address, e.g. http://localhost:3000, in a private window.

You should see

> You land on the sign-in page with email and password fields.

☐ Pass ☐ Fail Notes

The sign-in page.

A2 A wrong password is refused clearly

Signed out

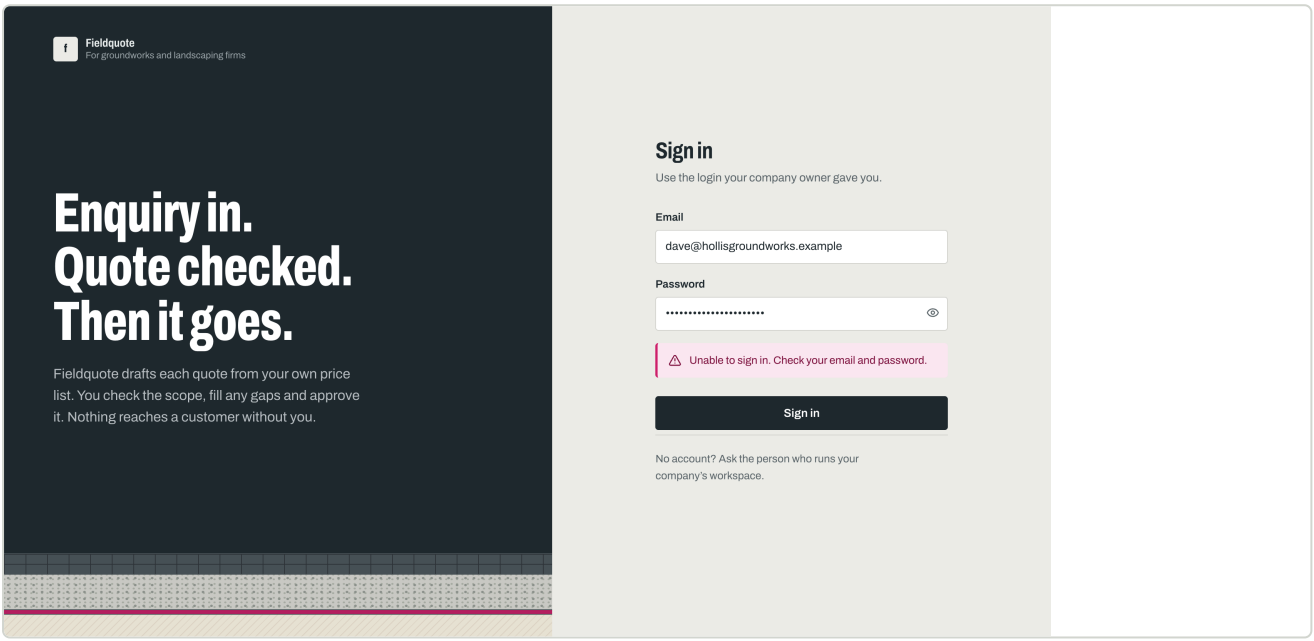

Steps

1. Enter Dave's email.
2. Enter a wrong password.
3. Click Sign in.

You should see

> A red message says sign-in failed. You stay on the sign-in page.

☐ **Pass** ☐ **Fail** Notes

The error after a wrong password.

A3 Repeated wrong passwords lock the email

Signed out

Steps

1. Enter the wrong password for the same email five times.

You should see

> That email can't sign in for 15 minutes, even with the right password.

☐ **Pass** ☐ **Fail** Notes

A4 Sign out asks first

Dave

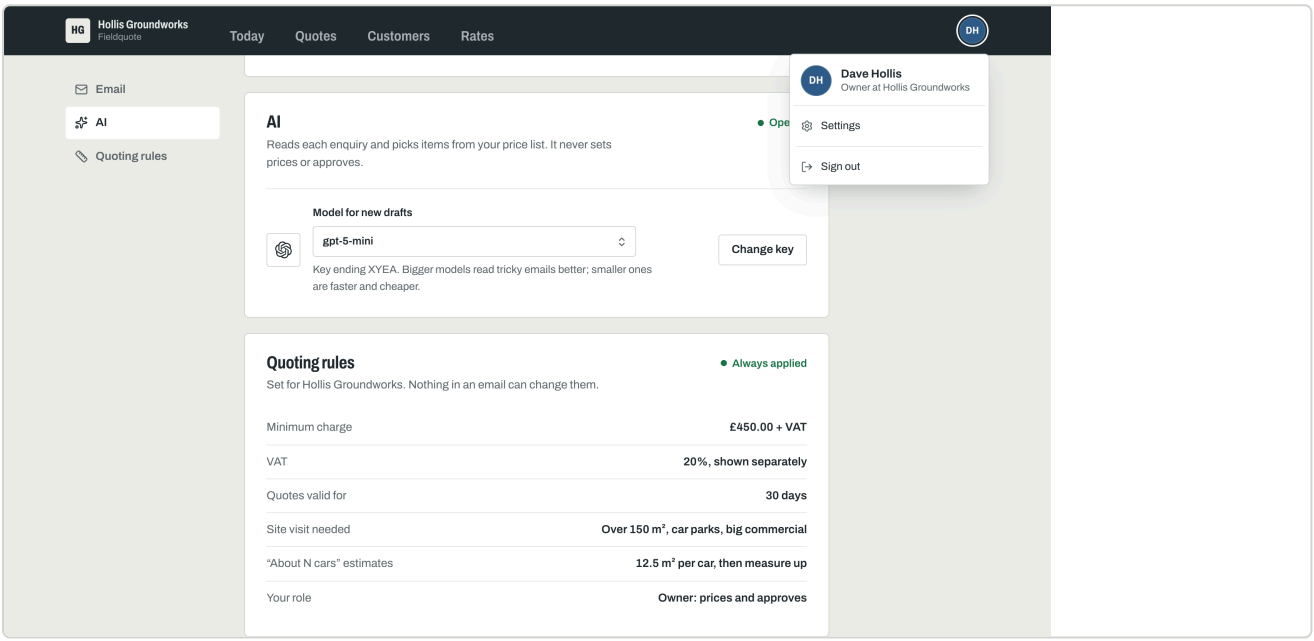

Steps

1. Click your initials in the top right.
2. Choose Sign out.
3. Confirm.

You should see

> A confirmation appears first. After confirming, you're back on the sign-in page.

☐ **Pass** ☐ **Fail** Notes

The account menu with Settings and Sign out.

B Today page

B1 Today shows what's waiting

Dave

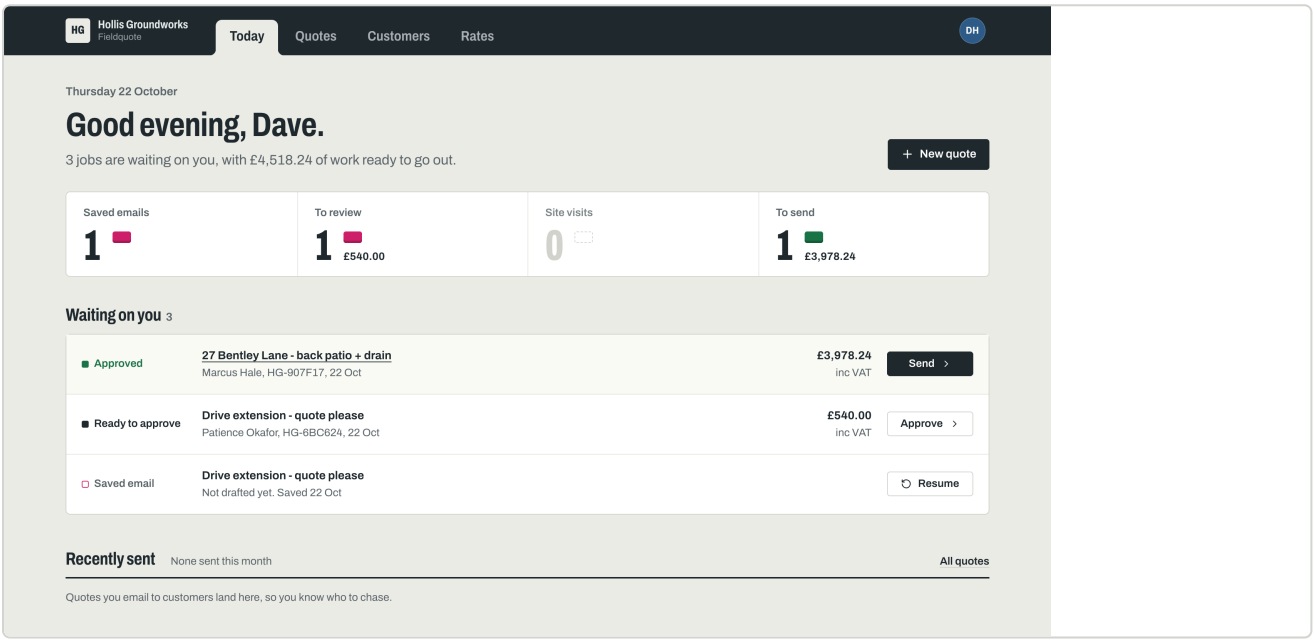

Steps

1. Sign in as Dave.

You should see

> A greeting, four stage counts (Saved emails, To review, Site visits, To send) with one coloured block per job, and the Waiting on you list.

☐ Pass ☐ Fail Notes

Today, signed in as Dave.

B2 A stage filters the list

Dave

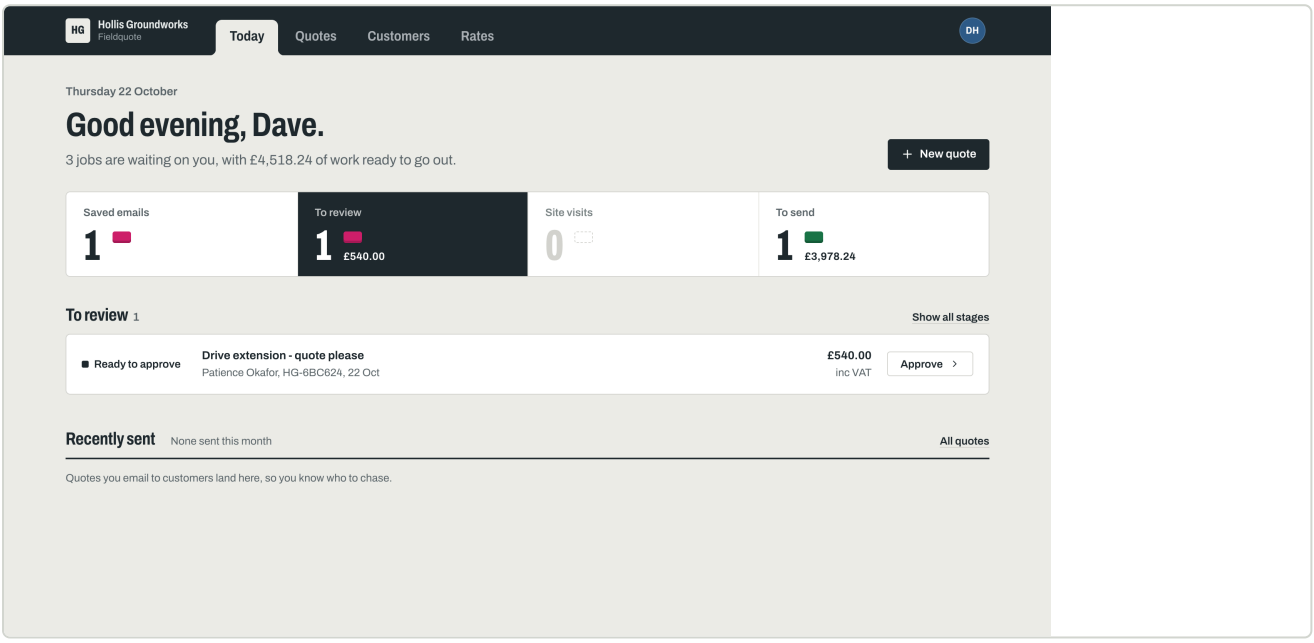

Steps

1. Click the To review stage.
2. Click it again.

You should see

> The first click turns the stage dark and shows only that stage's jobs, with a Show all stages link. The second click shows everything again. Stages with no jobs can't be clicked.

☐ Pass ☐ Fail Notes

Today filtered to To review.

C Drafting a quote

C1 The inbox lists recent emails

Dave, with email connected

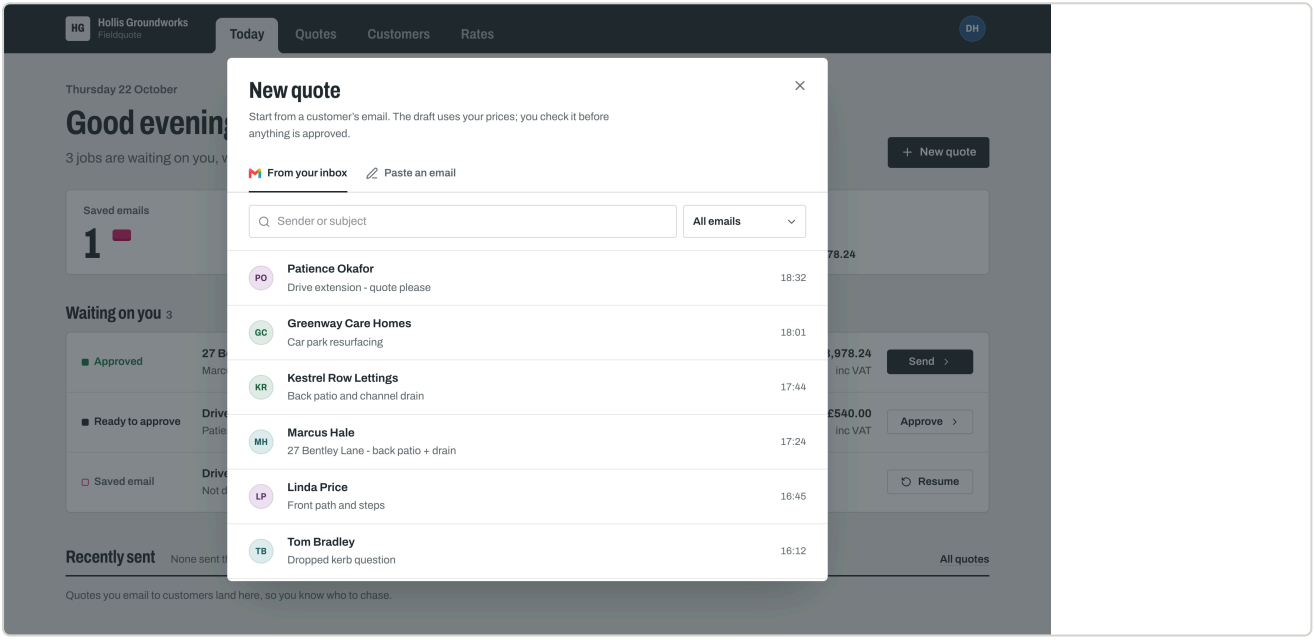

Steps

1. Click New quote.
2. Stay on From your inbox.
3. Scroll down the list.

You should see

> Recent emails, newest first, with more loading as you scroll. The tab shows your email provider's logo.

☐ **Pass** ☐ **Fail** Notes

New quote, From your inbox (demo emails shown).

C2 Draft from a sample email

Dave, with an AI key added

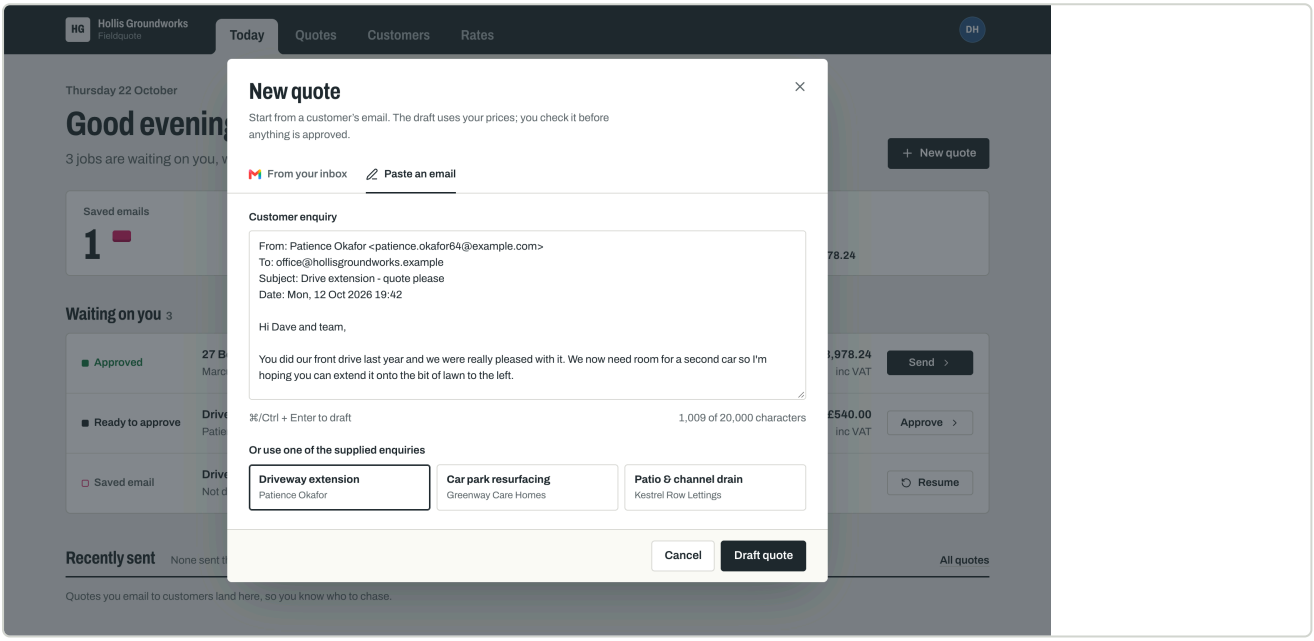

Steps

1. Click New quote, then Paste an email.
2. Pick Driveway extension.
3. Click Draft quote and wait up to 45 seconds.

You should see

> A priced draft for block paving opens. Items needing a person's check are listed: edge length, waste and the tap. The existing dropped kerb isn't charged as new work.

☐ **Pass** ☐ **Fail** Notes

Paste an email with the Driveway extension sample picked.

C3 Big jobs go to a site visit

Dave, with an AI key added

Steps

1. Draft the Car park resurfacing sample.

You should see

> No price at all. The quote is marked as needing a site visit, and the new dropped kerb is excluded.

☐ **Pass** ☐ **Fail** Notes

C4 Hidden instructions in an email are ignored

Dave, with an AI key added

Steps

1. Draft the Patio and channel drain sample.

You should see

> The draft ignores the email's request for a 40% discount and automatic approval, and shows a note saying so. The invoice contact and 30-day payment terms are kept.

☐ **Pass** ☐ **Fail** Notes

C5 An unfinished draft is kept

Dave

Steps

1. Start pasting an email, then close the window before drafting.

You should see

> Today shows it under Saved emails with a Resume button.

☐ **Pass** ☐ **Fail** Notes

D Reviewing and approving

D1 Approval waits until everything is checked

Dave

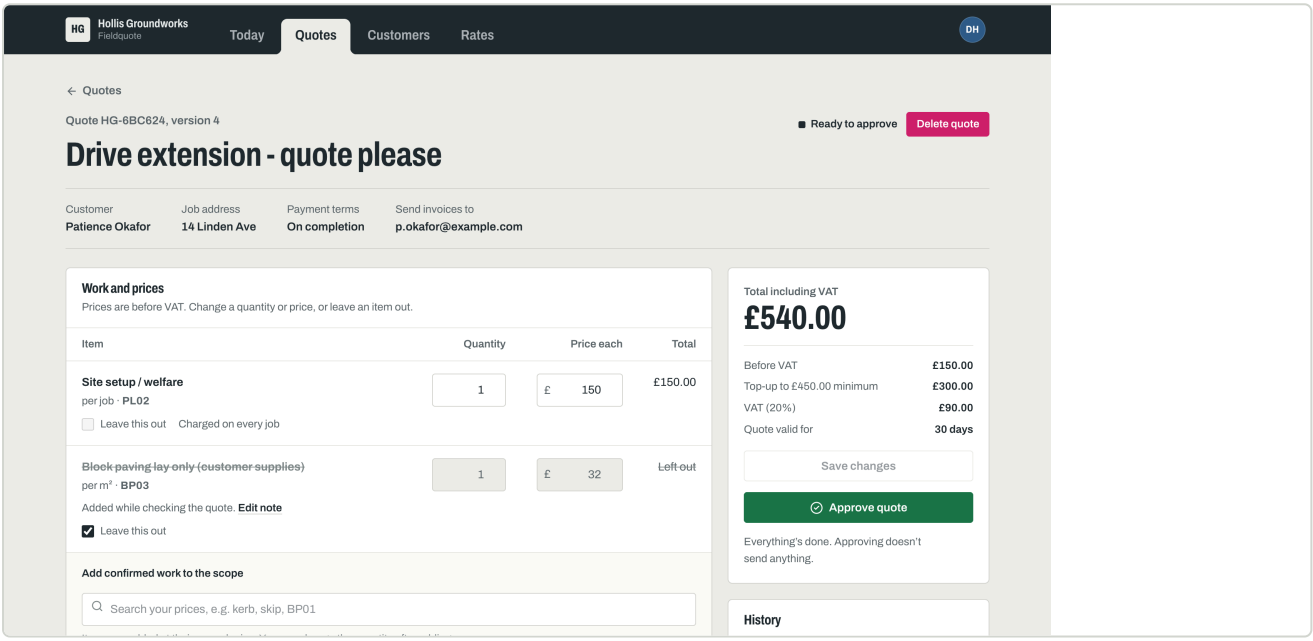

Steps

1. Open Quotes.
2. Open a quote marked Ready to approve or Needs review.

You should see

> Work and prices are listed with quantities and prices, the total including VAT is on the right, and Approve quote only works once every check is resolved.

☐ Pass ☐ Fail Notes

A quote being reviewed.

D2 Leaving an item out needs a reason

Dave

Steps

1. Tick Leave this out on an item without writing a note.
2. Try to save.

You should see

> You're asked to explain why it's left out.

☐ Pass ☐ Fail Notes

D3 Unsaved changes are protected

Dave

Steps

1. Change a quantity.
2. Click Quotes to leave the page.

You should see

> A warning asks whether to leave without saving.

☐ **Pass** ☐ **Fail** Notes

D4 Approve a quote

Dave

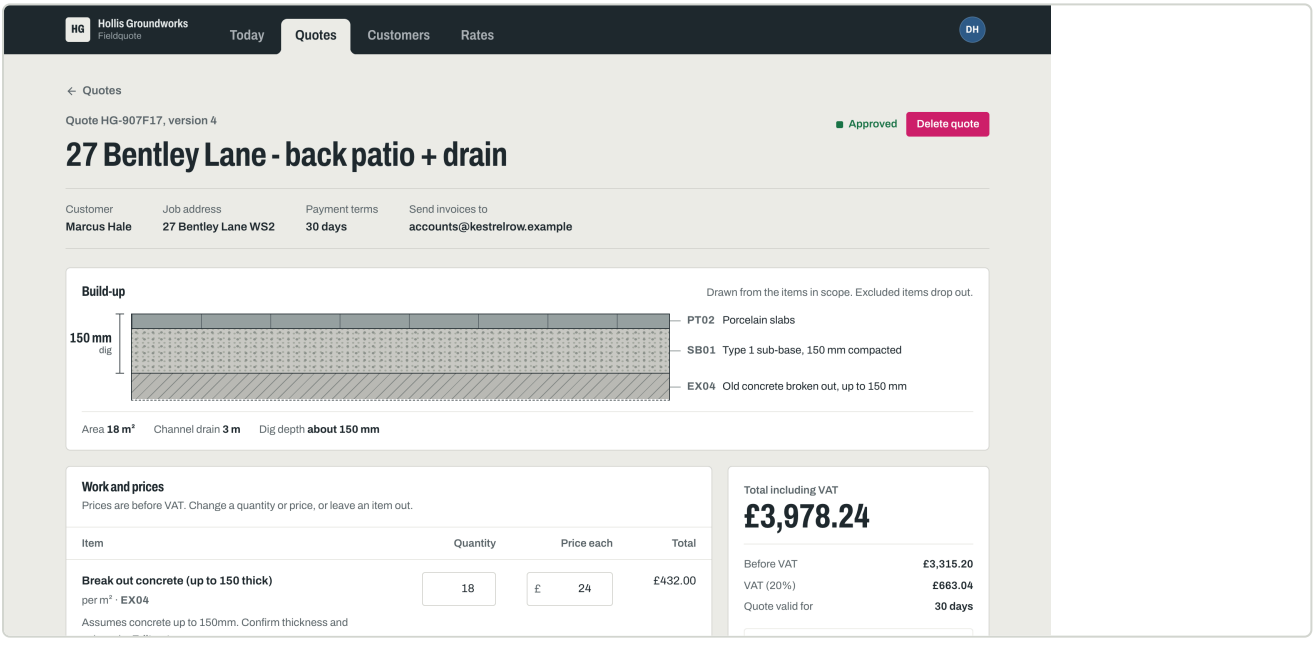

Steps

1. Resolve every check.
2. Click Save changes.
3. Click Approve quote and confirm.

You should see

> The quote shows Approved, with your name and an expiry 30 days out. A Send button appears.

☐ **Pass** ☐ **Fail** Notes

An approved quote.

D5 Editing clears the approval

Dave

Steps

1. On an approved quote, change a quantity.
2. Save and confirm.

You should see

> The approval is cleared and Approve quote is needed again.

☐ **Pass** ☐ **Fail** Notes

D6 A stale page can't overwrite newer work

Dave

Steps

1. Open the same quote in two tabs.
2. Save a change in the first tab.
3. Save a different change in the second.

You should see

> The second save is refused because the quote changed since that tab loaded.

☐ **Pass** ☐ **Fail** Notes

D7 The quotes list filters and searches

Dave

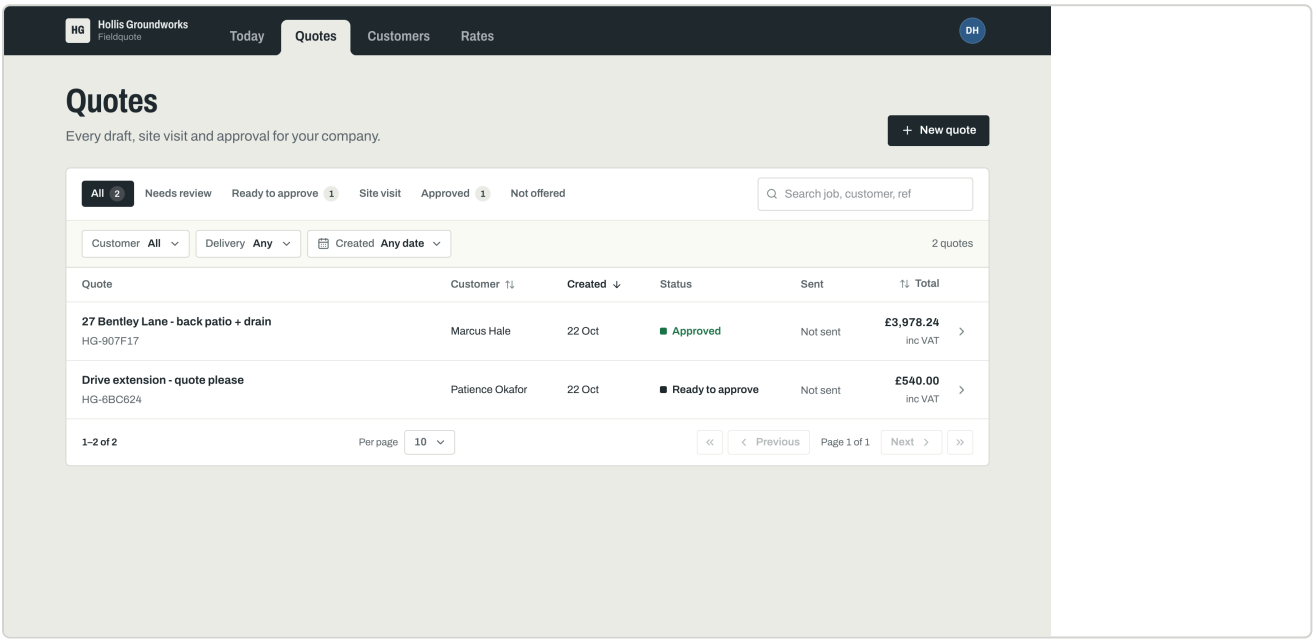

Steps

1. Open Quotes.
2. Try the status tabs, the search box and the Customer, Delivery and Created filters.

You should see

> The list narrows as you go, the count updates, and Clear filters resets everything.

☐ **Pass** ☐ **Fail** Notes

The Quotes list.

E Approver limits

E1 Shaz can approve but not change prices

Shaz

Steps

1. Sign in as Shaz.
2. Open a draft quote.
3. Try to change a price or add priced work.

You should see

> Quantities and ordinary checks can be changed and the quote approved, but prices can't be changed.

☐ **Pass** ☐ **Fail** Notes

E2 Shaz can't change rates

Shaz

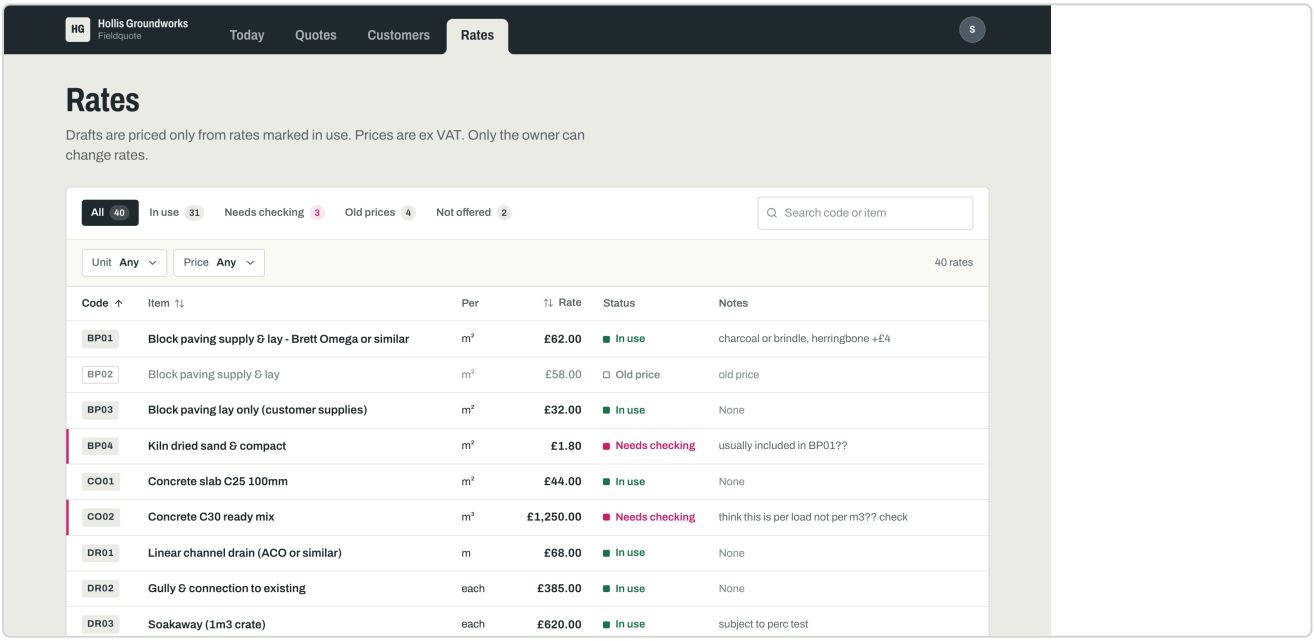

Steps

1. Open Rates.

You should see

> A note says only the owner can change rates. There's no Add rate button and no edit or delete buttons.

☐ **Pass** ☐ **Fail** Notes

Rates, signed in as Shaz.

F Company separation

F1 Gaz sees only Greenfield's data

Gaz

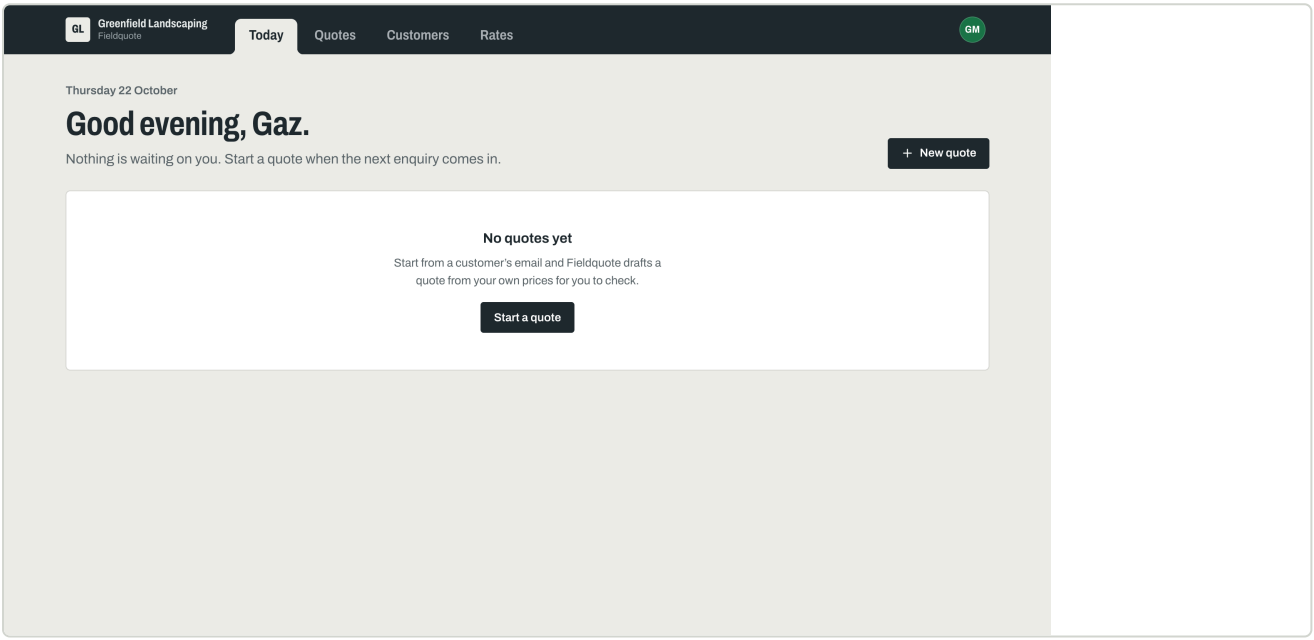

Steps

1. Sign in as Gaz.
2. Open Today, Quotes, Customers and Rates.

You should see

> Only Greenfield Landscaping's data. Nothing from Hollis Groundworks appears anywhere.

☐ **Pass** ☐ **Fail** Notes

Today, signed in as Gaz.

F2 Another company's quote can't be opened

Dave, then Gaz

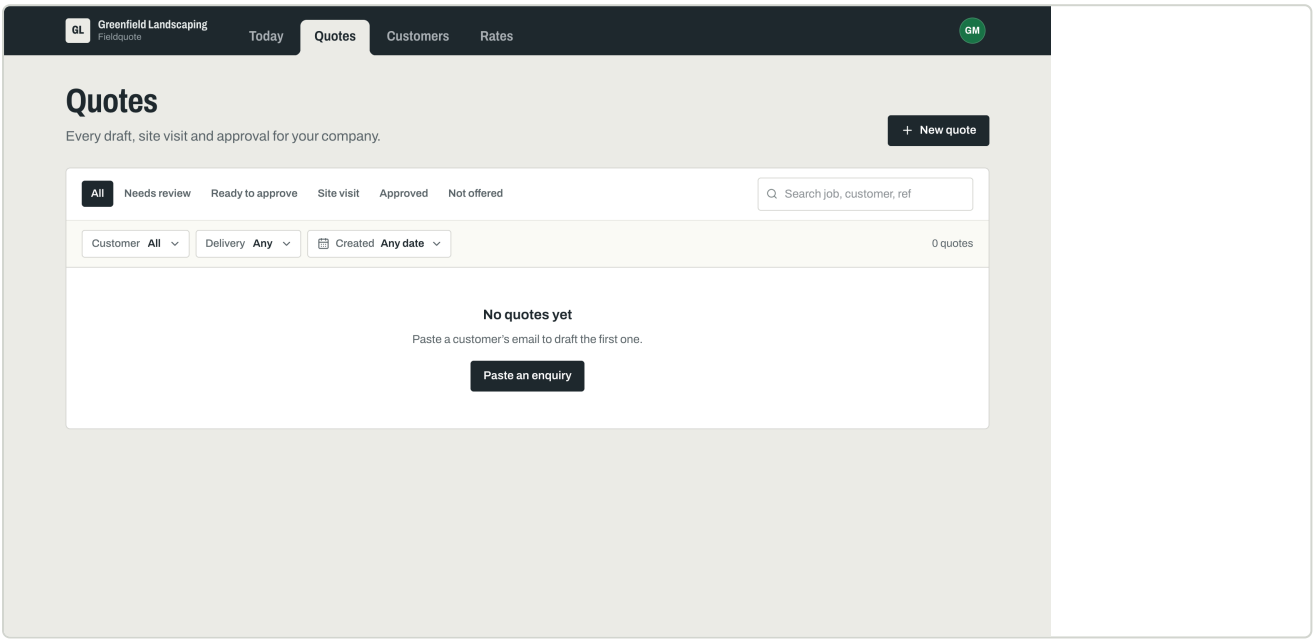

Steps

1. As Dave, open a quote and copy its address from the browser.
2. Sign in as Gaz and open that address.

You should see

> The quote isn't found.

☐ **Pass** ☐ **Fail** Notes

Gaz's Quotes list: no Hollis quotes.

G Site visits

G1 Price a job after the visit

Dave

Steps

1. Open a quote marked Site visit, such as the car park.
2. Record what was found on the visit.
3. Price the remaining items and approve.

You should see

> After recording the visit, the items can be priced and the quote approved like any other.

☐ **Pass** ☐ **Fail** Notes

H Rates and customers

H1 Rates list

Dave

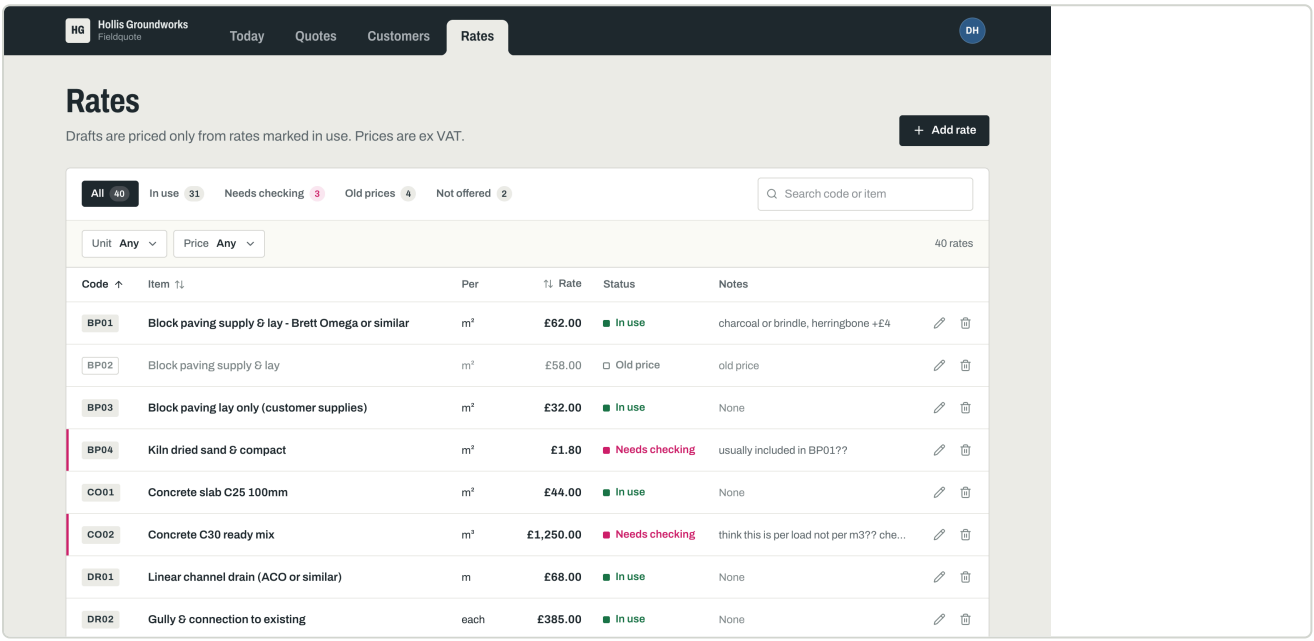

Steps

1. Open Rates.

You should see

> Every rate with its code, item, unit, price and status. Rates needing checking are marked.

☐ Pass ☐ Fail Notes

The Rates page.

H2 Add, edit and delete a rate

Dave

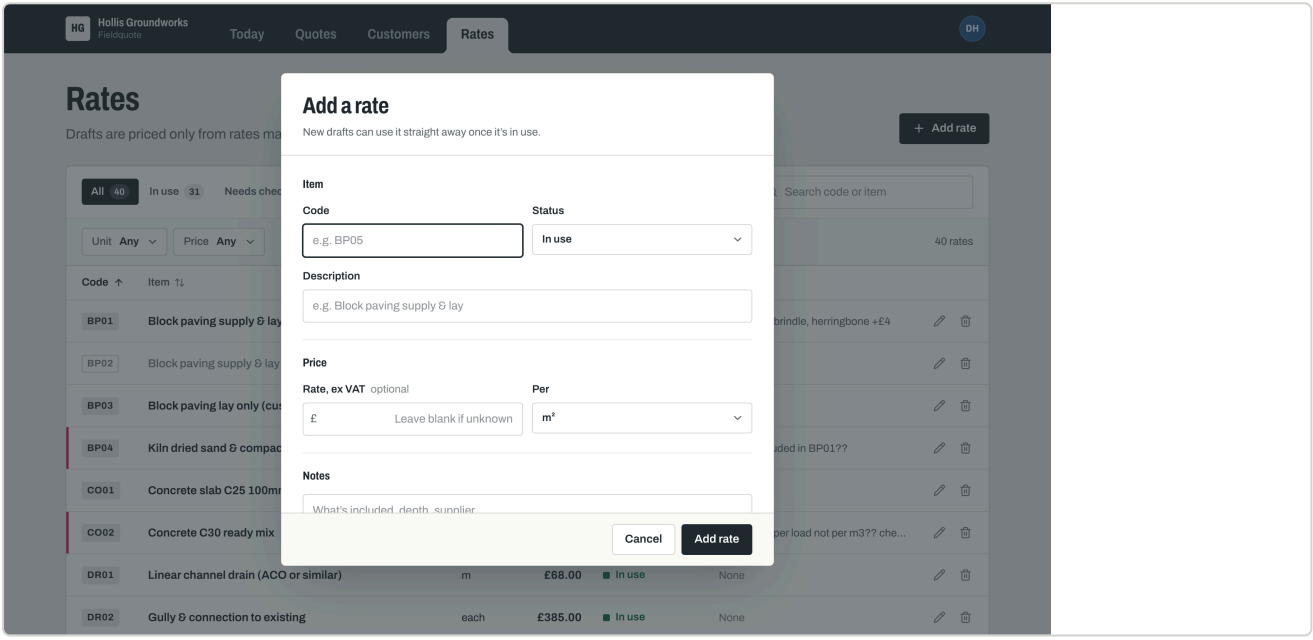

Steps

1. Click Add rate, fill it in and save.
2. Edit its price and save.
3. Reload the page.
4. Delete it and confirm.

You should see

> Each change sticks after reloading. Leaving out a required price, or using a badly formed code, shows a plain message next to the field to fix.

☐ **Pass** ☐ **Fail** Notes

The Add a rate form.

H3 Customers

Dave

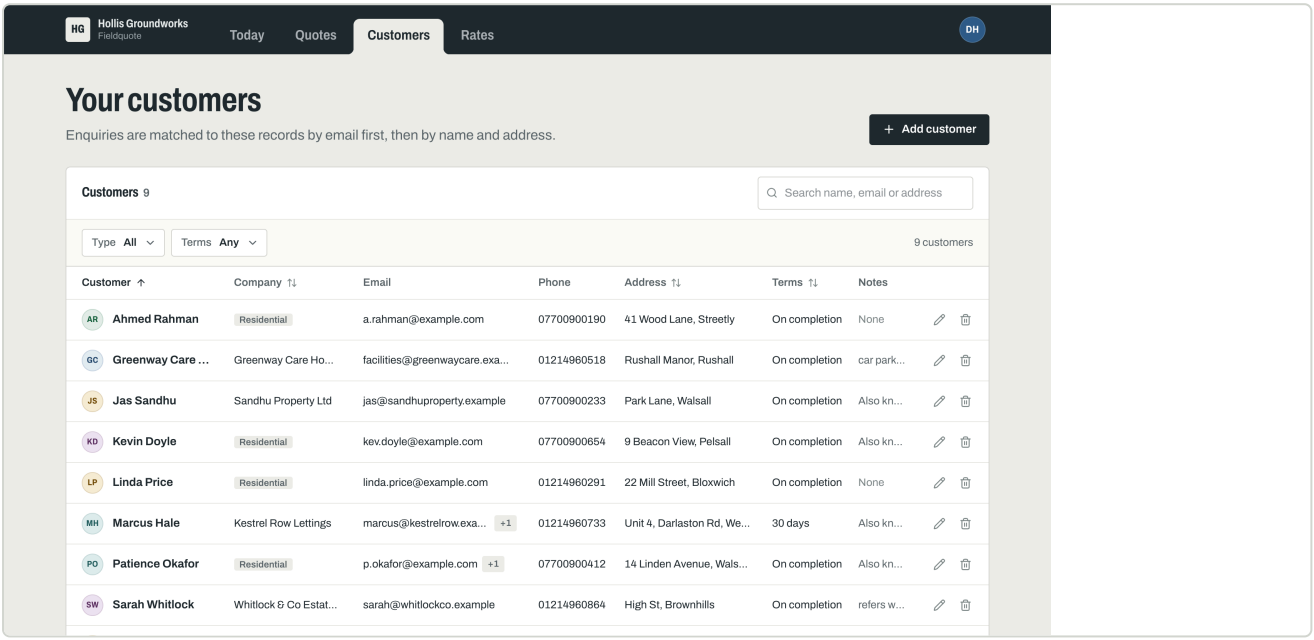

Steps

1. Open Customers.

You should see

> The company's customers with contact details, terms and notes, searchable and filterable.

☐ Pass ☐ Fail Notes

The Customers page.

I Settings

I1 Settings overview

Dave

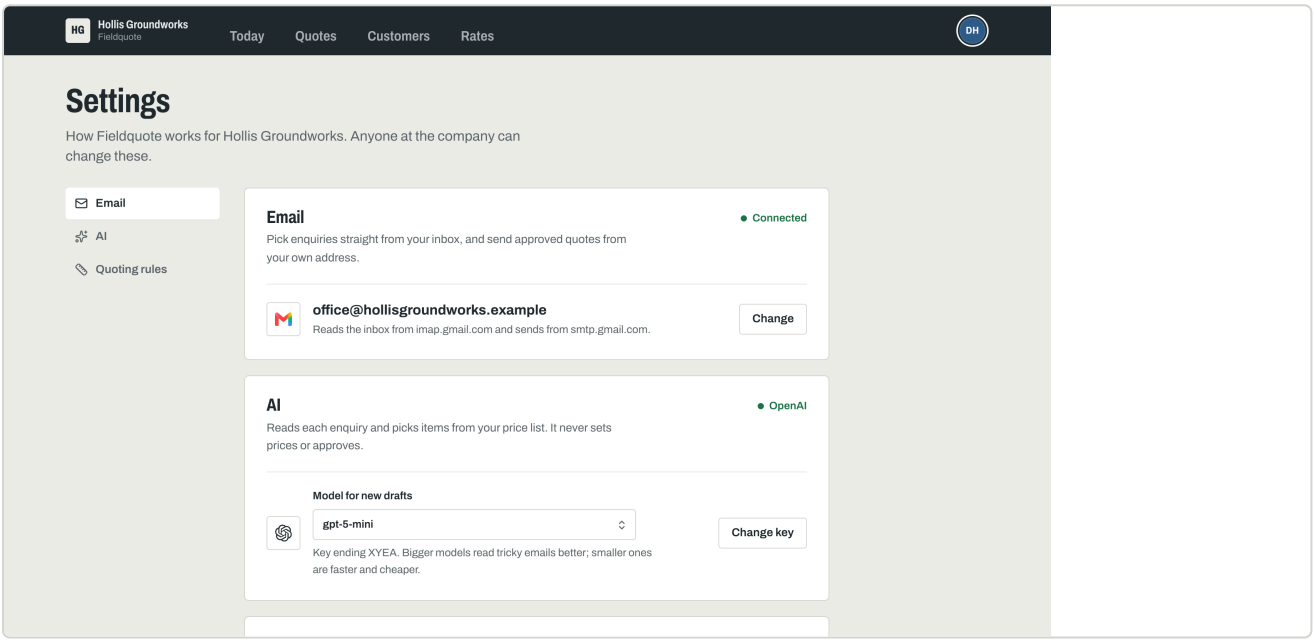

Steps

1. Open the account menu and choose Settings.

You should see

> Three sections, Email, AI and Quoting rules, each with its status. Connected services show their provider's logo.

☐ **Pass** ☐ **Fail** Notes

Settings.

I2 Connect email

Dave

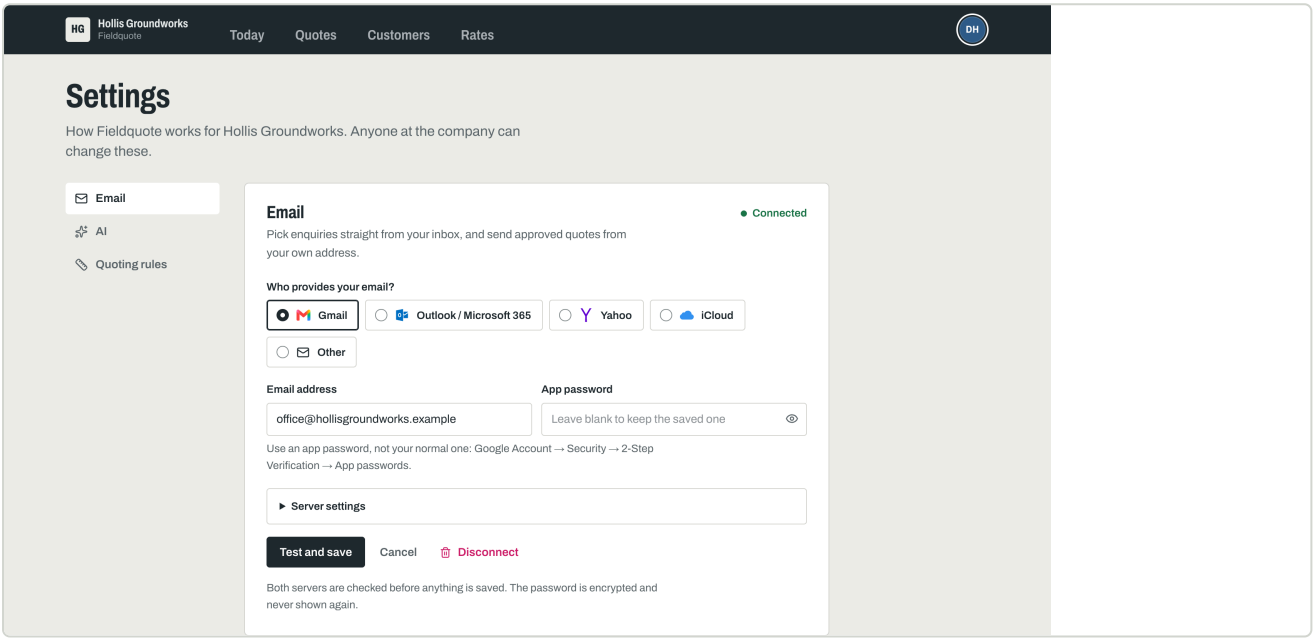

Steps

1. Under Email, click Change (or start fresh).
2. Pick a provider, enter the address and an app password.
3. Click Test and save.

You should see

> Both mail servers are checked before anything is saved. A wrong password shows a clear error and nothing is saved.

☐ Pass ☐ Fail Notes

The email form with provider logos.

I3 Add or change the AI key

Dave

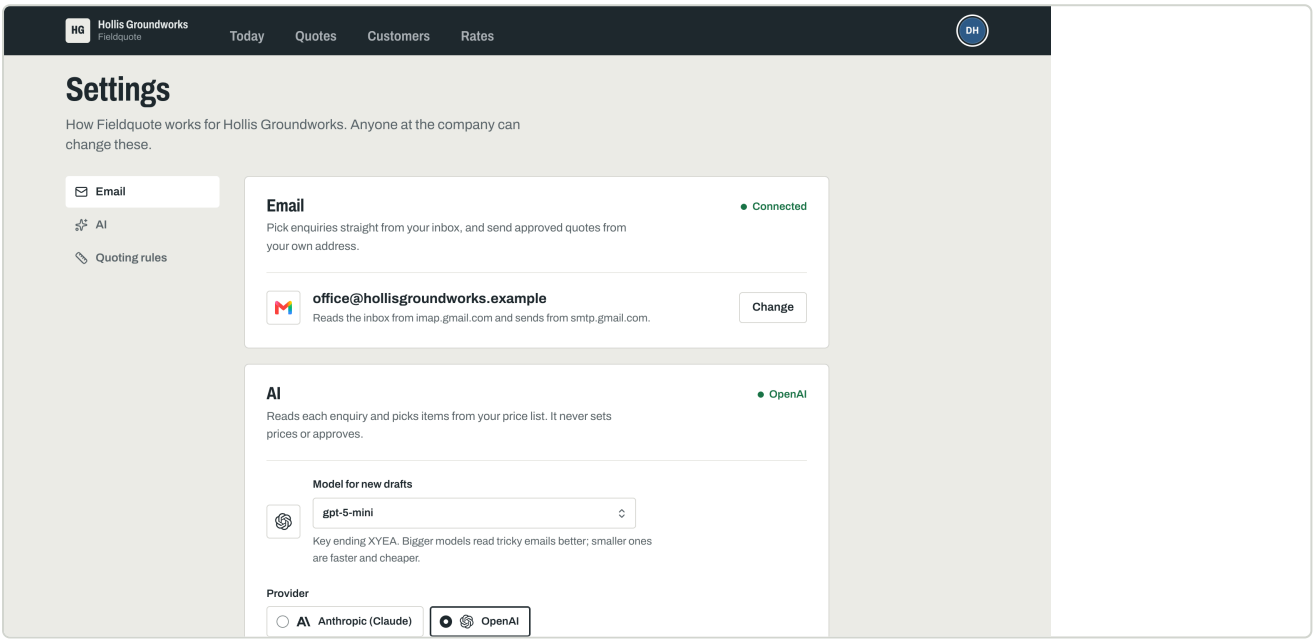

Steps

1. Under AI, click Change key.
2. Pick a provider and paste a key.

You should see

> A key in the wrong format shows a hint and Replace key stays disabled. A real key is checked, saved, and only its last four characters are shown afterwards.

☐ Pass ☐ Fail Notes

The AI provider choice and key field.

14 Search for a model

Dave

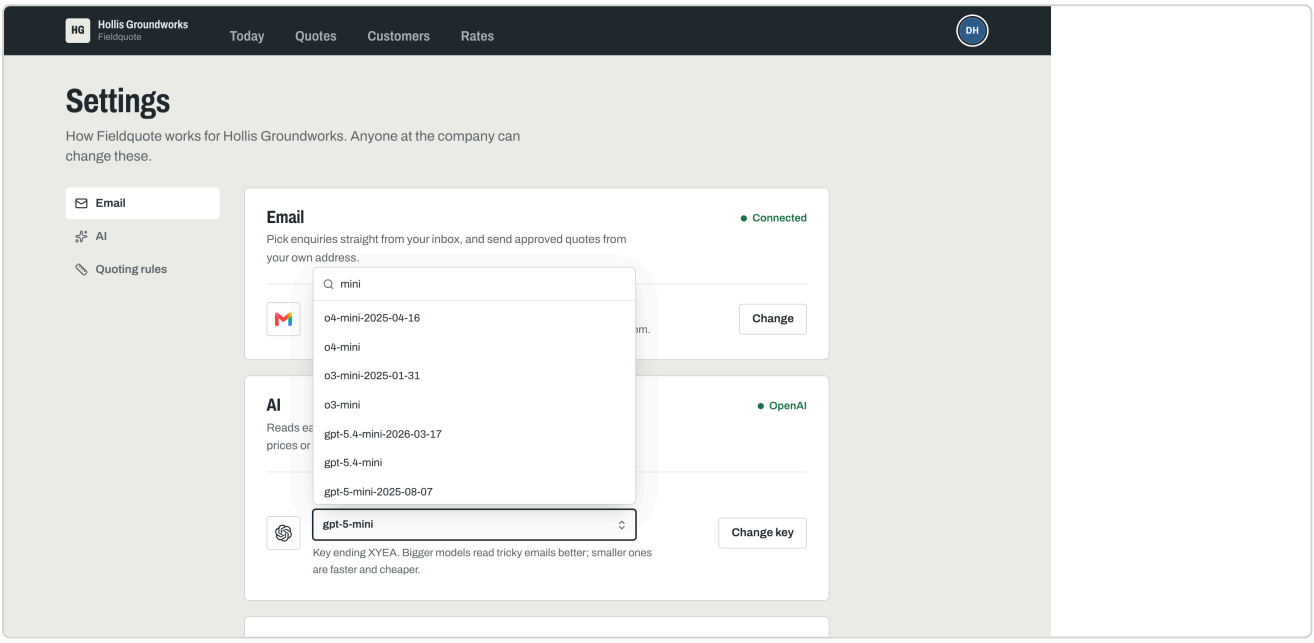

Steps

1. Open the Model for new drafts dropdown.
2. Type part of a model name.

You should see

> The list filters as you type and scrolls inside the dropdown rather than running off the page. Picking a model saves it straight away.

☐ **Pass** ☐ **Fail** Notes

Searching the model list.

I5 Quoting rules

Dave

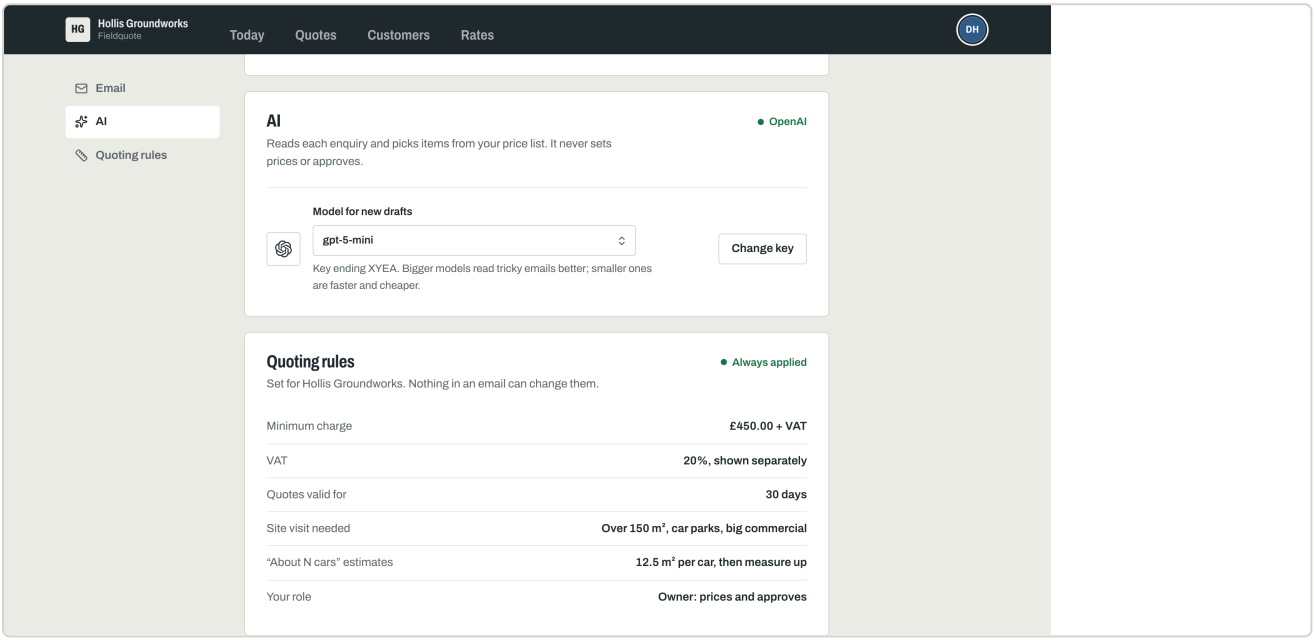

Steps

1. Scroll to Quoting rules.

You should see

> The minimum charge, VAT, how long quotes stay valid, the site-visit rule, the per-car estimate and your role.

☐ **Pass** ☐ **Fail** Notes

Quoting rules.

I6 Drafting needs a key

Dave

Steps

1. Remove the AI key.
2. Try to draft a quote.

You should see

> You're asked to add a key in Settings first.

☐ **Pass** ☐ **Fail** Notes

J Sending a quote

J1 Draft from an inbox email

Dave, with email and AI connected

Steps

1. New quote, From your inbox.
2. Open an email and click Draft quote from this email.

You should see

> A draft is created, and the email is then marked Quote made in the inbox.

☐ **Pass** ☐ **Fail** Notes

J2 Send an approved quote

Dave, with email connected

Steps

1. Open an approved quote and click Send.
2. Read the confirmation before sending.

You should see

> The confirmation shows who it goes to, the address it's sent from with its provider logo, the subject and the full text. The email has priced items and totals only, never internal notes.

☐ **Pass** ☐ **Fail** Notes

K Deleting a quote

K1 Delete with confirmation

Dave

Steps

1. Open a quote and click Delete quote.
2. Cancel.
3. Click Delete quote again and confirm.

You should see

> Cancelling keeps the quote. Confirming removes it, including after a reload.

☐ **Pass** ☐ **Fail** Notes

L Phone-sized screens

L1 Pages fit a phone

Dave

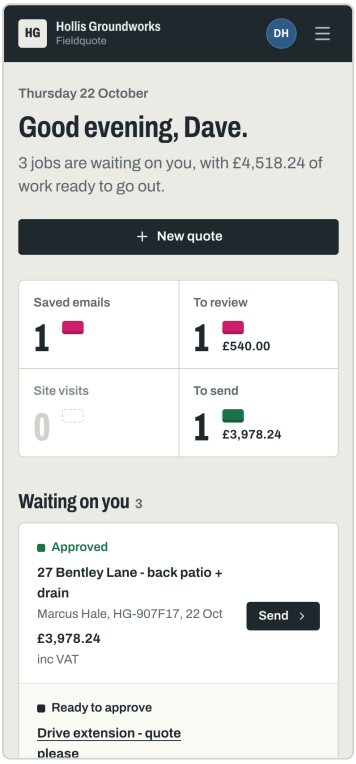

Steps

1. Open the app on a phone, or the browser's device mode at about 390px wide.
2. Visit every page.

You should see

> No sideways scrolling. Stage counts sit in a two-by-two grid, and buttons are full width where it helps.

☐ Pass ☐ Fail Notes

Today on a phone.

L2 The menu works on a phone

Dave

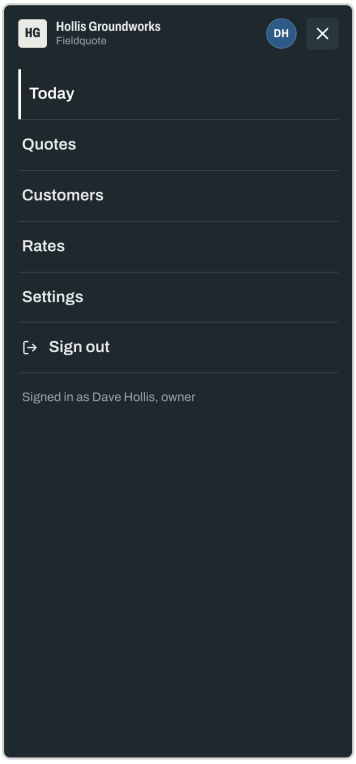

Steps

1. Tap the menu button in the top right.

You should see

> The full navigation opens, including Settings and Sign out, with who's signed in at the bottom.

☐ Pass ☐ Fail Notes

The phone menu.

M Security spot checks

M1 The API refuses signed-out requests

Signed out

Steps

1. In a private window, open /api/rates.

You should see

> The request is refused (401) and no data is shown.

☐ Pass ☐ Fail Notes

M2 Saved secrets are encrypted

Database access

Steps

1. Look at the fieldquote.company_ai_credentials and fieldquote.company_mail_accounts tables.

You should see

> AI keys and mailbox passwords are stored encrypted, never as plain text.

☐ Pass ☐ Fail Notes
